

Wisconsin Power and Light Co.
An Alliant Energy Company

400 Koopman Lane
Elkhorn, WI 53121-2006

www.alliantenergy.com

There are two steps to the construction process. Listed below are some of the things required from you as a customer. Your cooperation will help us to provide you with the best service possible.

1. Engineering

A scaled site plan or certified survey with the location of your house as it sits on your lot including septic plan and well locations (new construction).

The preferred meter location, including footage from a corner of home.

Proposed deck or patio locations, and any future additions such as a swimming pool, landscaping, garage, etc., anything that may effect the underground trench route or overhead service drop.

Sign and return an application for service to Alliant Energy.

Alliant Energy must approve meter socket location.

Provide us with the construction address (house or fire number and street or road name).

2. Construction

Provide any and all easements and secure right of way for the extension of utility service. (Alliant Energy will secure highway permits, etc.)

Locate and mark all existing customer owned underground facilities (this includes septic, sprinkler, well, water, gas line, and electric systems) Alliant Energy will not be held responsible for damage to customer owned underground facilities which have not been located or marked improperly by the customer.

Underground construction requires that back filling be completed to within 6" of final grade with 10' wide trench route clear of dirt piles, construction material, brush, trees, etc. and notification to be given to Alliant Energy when this has been completed.

Billing if any, must be paid prior to construction.

Winter construction charges are in effect December 1st through March 31st.

The City, Town, or Village electrical inspector must inspect all electric service entrance installations (where available), inspector notifies Alliant Energy.

A wiring statement is required if there is no electrical inspector.

In the case of duplex, apartments, and multi-units buildings, meter sockets, and their corresponding breaker panels must be clearly and permanently identified for each unit with adhesive numbers or letters.

Please contact the Engineering Department @ 800-862-6222 ext.7410934, 262-741-0934, or by fax 262.741.0952 with any questions.

Locating and Restoration Agreement

Before construction will be scheduled this form must be signed, dated and returned to our office.

Customer Name _____ Work Request # _____

Construction Address _____

City, Village, Town, _____

Locating

The Customer request that Alliant Energy install poles, anchors, or underground cable to provide electric service to the above address. Alliant Energy will call Diggers Hotline to facilitate the marking of existing public utility underground facilities including electric, telephone, cable TV and natural gas, etc.

The customer agrees to physically mark the location of their privately owned obstacles that lie underground within 10 feet of pole and anchor locations and 10 feet on either side of the proposed trench route. Such obstacles include, but are not limited to, lot pins or survey markers, septic and sewer systems, water systems, buried wires for out-buildings or decorative lighting, and gas lines. The Customer shall mark the location of all obstacles with stakes, flags or by painting the ground. The Customer accepts the responsibility for damages to any such underground obstacle that the Customer fails to mark, or marks incorrectly. The Customer shall also be responsible for repair arrangements.

Restoration

The Customer is responsible for the restoration of property owned by others that may be affected by the installation of electric facilities for the above project. Alliant Energy will bill costs to the Customer and arrange for the restoration of the property involved. The customer is also responsible for complete restoration of their property at the above construction address.
