

Permit #: SE-2019-30-4047

Waterbody Name: Lilly Lake

Date: 5/7/2019

Expiration Date: 10/1/2019

Subject: Aquatic Plant Management Permit Application

Dear Applicant,

Enclosed is your approved permit for the chemical treatment of aquatic plants in a maximum of 23.94 acres.

This permit has been issued in accordance with Wisconsin Administrative Code NR 107. Aspects of this permit may not be changed without prior approval of the Department of Natural Resources. Issuance of this permit is not an endorsement for the action authorized. Please note the permit conditions below.

**Lake Specific Permit Conditions: (All checked conditions apply to this permit)**

Herbicide applications may be limited in areas where high value native aquatic plants (such as native pondweeds, native milfoils, water shield, water lilies, bulrush, water celery, bladderwort, naiads, crowfoot, etc) are more abundant than Eurasian watermilfoil, curly-leaf pondweed, or coontail.

Treatment may not occur in the DNR designated sensitive area.

The herbicides \_\_\_\_\_ may not be used.

Treatment must occur in the spring when Eurasian watermilfoil is actively growing (2 to 4 inches of green tips).

Results of the pretreatment aquatic plant survey and proposed treatment areas must be submitted to Michelle Soderling ([Michelle.Soderling@wi.gov](mailto:Michelle.Soderling@wi.gov)) a minimum of 4 working days prior to anticipated treatment.

You must notify Michelle Soderling by e-mail ([Michelle.Soderling@wi.gov](mailto:Michelle.Soderling@wi.gov)) a minimum of 4 working days prior to anticipated treatment to schedule supervision.

**General Permit Conditions: (All conditions apply to this permit)**

The permit holder, per NR107.08(8), shall submit the Aquatic Plant Management Treatment record for treatment as follows:

- A. Immediately, if any unusual circumstances occur during treatment.
- B. Within 30 days, if treatment occurs.
- C. By October 1 of this year if no treatment occurred.

A copy of the permit application must be provided to riparian property owners in and adjacent to the treatment area before the treatment may occur. The application may be provided by US mail, e-mail, or a US mail postcard directing the property owner to a public website that has posted the permit application.

Treatment concentration cannot exceed maximum recommended dosage for target species, as listed on the product label.

All equipment used in the lake must be sanitized before entering waters of the state and must abide by all provisions of NR 40.

Posting signs shall be placed on each individual property in and adjacent to the treatment area. These posting signs shall clearly indicate which properties have and have not had treatment in front of their riparian property. A posting sign shall also be provided at the public boat launch, which will include a map of the treatment area.

Application is restricted to the permitted area as shown on the map included in the permit application.

Treatment in the permitted application area will not be performed in front of riparian property if the owners indicate they do not want treatment in writing to the \_\_\_\_\_ N/A or to the Department of Natural Resources.

Any chemical treatments or locations not described in this application will require an additional permit from the Department. Future permit applications will be evaluated based on the information at that time.

Please feel free to contact me by email if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to be "MS", with a long horizontal flourish extending to the right.
